

Letter of Recommendation

It gives me immense pleasure to recommend Ms. Prachi Kunjir at your esteemed university for the MS program in MSIS. I was her Database management subject teacher at Modern College affiliated through Pune University.

From the start, it was evident to me that Prachi was a polite, hardworking, and very dedicated. I have observed that she was always more interested in Data related subjects. I found her ability to grasp technical concepts and imply them successfully as one of her qualities. She executed many assignments on SQL, MongoDB and in other DBMS languages. Prachi suffered a setback in the second year when she scored less; however with a right blend of determination, focus and aptitude, she managed to consistently secure a distinction throughout. Her clarity of concepts combined with the right attitude towards learning is her stepping stone. She is very eager to learn and participate in practical study.

Prachi has a very good problem solving ability and a unique characteristic of believing in herself rather than being dependent on others. She likes to be convinced with reasons rather than believing on what is professed. Prachi has a pleasing demeanour and shared a good rapport with her classmates as well her instructors. She also has a capacity to work individually and also in a group where she often likes to lead them and work with total co-operation. She had shown interest in being a teaching assistance and helped me for the same.

She not only understands and delivers a subject intelligibly but also has excellent communication and presentation skills. She has good problem solving and analytical skills. She is proactive and has an immensely positive attitude. She is also social and interactive and had volunteered for many college events.

I really appreciate her desire to pursue Master's in your University and I believe that Prachi would excel in her domain of study. I request you to consider her application for the graduate program as she is a great learner with a thirst for research. I would most definitely recommend Prachi for the MS program at your university with a full financial aid.

Yours Sincerely,

Prajakta Ambekar
